My portfolio

## CORE TECHNOLOGIES

#### General Skills {

- Web application deployment
- Agile development
- Teamwork
- Object Oriented Programming

#### Coding Knowledge {

- NodeJS
  - GIT
- Angular
- JSON, XML
- HTML5
- RESTful API
- JavaScript
- MongoDB
- ReactJS
- Passport
- CSS, Flexbox JWT
  - Express

## Softwares Knowledge {

Visual

Java

- Auth0
- Studio
- 0kta
- Atom
- Postman
- MongoDB
- Heroku
- MySQL

#### EDUCATION

- University of Central Florida - Bachelor of Science in Aerospace Engineering (2020)
- UCF Coding Bootcamp (May 2019
  - November 2019)

#### EXPERIENCE

#### KORGI (Oct 2019 - Nov 2019) {

- Responsible for building database with MongoDB for storing user information.
- Created backend services with NodeJS to construct RESTful APIs to communicate with data storage.
- Built mechanism for credential protection with JWT and user authorization with Passport.
- Constructed server on heroku to host and deploy the application.
- Participated in frontend to form the user interface by using ReactJS and Redux for state management.

### BITS OF PAPER ( Aug 2019 - Sep 2019 ) {

- Created a friendly platform for users to carry out practice on cryptocurrency.
- Utilized HTML5 and CSS to build user interface for user interaction.
- Constructed and maintained backend services with MySQL.
- Pulled real time data from Cryptonator website using their RESTful APIs to populate displayed data to users.

#### TUTORING ( Aug 2014 - May 2016 ) {

- Instructed students ranging from age 6 to 18 from elementary level mathematics through pre-calculus.
- Responsible for maintaining and clean and friendly environment for students.
- Managed the facility and scheduled appointments.
- Attended and assisted with personal subject parental requests.

## ACHIEVEMENT

UCF Coding Bootcamp Certificate
